gamescom event level

Many events took place at the event level in hall 10.2. Funsport, action and chillout was the motto. A highlight of the event level was the gamescom cosplay village.

Code of Surrealism -

Immersing oneself in surreal phantasy worlds made to appear strangely real by pixels, code and controller. A phenomenon of our time?

Code of Surrealism exhibited original works by Salvador Dalí and their transmission in digital form. Dalí's illustrations of Don Quixote intermingle with contemporary technologies – an amazing fusion of pictorial reminiscences and contemporary imagery. The Cologne Game Lab was also unveiling its game Drawlí for the first time, a surrealistic gamer-created windmill world awaiting discovery!
